January-June, 1928

THE SOCIETY OF AUTOMOTIVE ENGINEERS, INC.
29 WEST THIRTY-NINTH STREET
NEW YORK CITY

R.A.E. Journal

1917-1918

1917

S. A. E. JOURNAL

INDEX TO VOLUME XXII, JANUARY-JUNE, 1928

	PAGES		
January	1-144	Aircraft Engines	
February	145-292	Air and water-cooled, relative merits	602
March	293-402	of Diesel	602
April	403-502	Failures due to lubrication troubles	223
May	503-616	Life greatly increased	222
June	617-740	Packard	602
		Radial, design of	731
		Should design for easy maintenance	222
		Special fuel and oil not needed	223
		Starters	387
A		Aircraft storage-battery standardiza- tion	697
Absorption and production	364		
Accelerometer design	636	Airplanes	
Accidents		Canadian aerial surveying	620
Causes of	685	Choice of single or multi-engine, de- pends on conditions of use	193
Governing causes of traffic	318	Comfortable seats demanded	53
Method of making people think	318	Coordinated crew for large	193
Must put a premium on carefulness	318	Designed to utilize rigidity of metal	431
Why traffic happen	317	Difference in operating costs in single and multi-engine	193
Accounting, motor-transport	173	Duplicate metal structures uniform in strength	431
Accounting practices of fleet operation	30	Duralumin all-metal construction	430
Accounts, classification of	173	Internally braced wing	54
Addresses		Multiple-engine drive-unit available for	194
Hunt, J. H.	287	Methods of building metal structures	426
Wall, W. G.	287	New type of propeller	77
Advance of mechanical power in Penn- sylvania (R. U. Blasingame)	112	Number of cylinders in engine con- trols overhaul cost	192
Advantages of gasoline fuel-pumps over other gasoline-supply systems (A. M. Babitch)	267	Propeller speed less with a dead en- gine	191
Advantages of multiple ignition (H. M. Jacklin)	268	Range of	599
Advertising and prosperity	497, 519	Safety depends on flying altitude	194
Advisory Board of Government Techni- cal Committee on Lubricants and Liquid Fuels, representative	263	Single-engine	191
Advisory Board on Dictionary of Gov- ernment Specifications, representa- tive	262	Has longer range	190
Advisory Committee on Structures and Fabricated Metals of the Bureau of Standards, representatives	262	Versus multiple-engine	190
Aerodynamic differences, other	50	Solution lies in adjustable-pitch pro- pellers	191
Aeronautic bolt and nut standardiza- tion	698	Speed	678
		Turning forces present problem	191
		Airport lighting (H. E. Mahan)	345
Aeronautic Division, S. A. E.		Airports	
Activities	322, 398	Beacons of 8,000,000 cp.	345
Detroit meeting	595	Civic planning for airways and	411
Personnel	259, 409, 697	Ground transportation connections to	414
Standardization session	591	Illuminated wind-direction indicator	349
Aeronautic Division of Detroit Section	405, 497	Lighting	597
Aeronautic instrument mountings	398	Lighting layouts	349
Aeronautic standards session in Detroit	489	Location of	412
Aeronautics		Methods of field floodlighting	347
Monoplane or biplane	49	Obstruction and approach lights	346
Progress in	597	Prime necessity	412
University of Washington research plans	80	Seaplane to be considered	414
Wright Brothers medal	382	State boundaries not an insurmount- able obstacle	417
Agricultural Power Equipment Divi- sion S. A. E. personnel	259	Airship R-100	657
Agriculture in New York State	385	Airways	
Aids to international touring	258	Civic planning for airports and	411
Ailerons, lightness of	428	Engineering for	520
Air-cleaner mountings, standardiza- tion	107, 712	ALLEN, BERNARD, ON GENERAL THEORY OF CONTAINER USE	74
Air-Cleaners		Allen, George B. (discusser)	369
Bibliography	38	ALLEN, H. H., ON RECENT DEVELOPMENTS IN HEADLIGHTING RESEARCH	278
Mountings	107	ALLEN, J. W., ON STARTERS FOR AIRCRAFT ENGINES	387
Reduce wear	38	Alloy-Steels	
Air-cooled car (E. S. Marks)	296	Applied to the automotive industry	484
Aircraft		Characteristics described	484
Advantages and uses of flanged tub- ing	429	Alloy-steels as applied to the automo- tive industry (Dr. Birger Egeberg)	484
Airworthiness control	537	Alloys, new metal, aid weight reduc- tion in Diesel engines	184
Control of design	537	Aluminum	
Designed to utilize rigidity of metal	431	Automotive uses of	600
Forming and assembling hull mem- bers	428	Cylinder-head for Pierce-Arrow cars	252
Helicopter	492	Pistons	604
Instruments	670	Aluminum Alloy	
Lightness of wing and aileron struc- tures	428	Application of, pistons spreading	325
Sheet-metal gives strength with light weight	428	Good properties of	325
		Pistons in service	329
		Aluminum-alloy pistons in gasoline and oil engines (H. A. Huebotter)	266, 325
		American Automobile Association Ex- ecutive Board, representative	262
		American Bureau of Welding, repre- sentative	262
		American-Canadian future of aviation	406
		American Electric Railway Associa- tion, Committee on Motorcoaches, representatives	263
		American Engineering Standards Committee	
		Ball Bearings Sectional, activities	483
		Executive Committee, representative	262
		Form and Arrangement of Specifica- tions Committee, representative	263
		Main Committee, representatives	262
		Preferred Numbers Special Commit- tee, representative	263
		Sectional committees, S. A. E. cooper- ation with	249
		American Marine Standards Commit- tee of Division of Simplified Prac- tice, representatives	262
		American Society for Testing Materials	
		Committee A-1 and Its Subcommit- tee X on Automobile Steels, repre- sentative	262
		Committee A-7 on Malleable Iron, representative	263
		Committee D-2 on Oils, representa- tive	263
		Die-Casting Metals and Alloys Sub- committee XV, of Committee B-2, representative	263
		Joint Committee on Investigation of Phosphorus and Sulphur in Steel, representative	262
		Rubber Products Subcommittee D-11, representative	263
		Sheet Steel Subcommittee XIX of Committee A-1 on Steels, repre- sentative	263
		Subcommittee XII on Methods of Chemical Analysis of Committee A-1 on Steels, representative	263
		Tool Steel Subcommittee XIV of Committee A-1 on Steels, repre- sentative	263
		American Society of Mechanical Engi- neers Special Research Committee on Mechanical Springs, representa- tive	263
		America's future passenger-car (T. J. Little, Jr.)	487
		AMMERMAN, K. J., ON MOTORCOACH DE- SIGN	351
		Anderson E. S. (discusser)	68
		ANDERSON, GEORGE P., ON TRUCK DESIGN	607
		Anglada, Joseph A. (discusser)	518
		Annual Dinner, S. A. E.	
		Reviewed	287
		Hunt, J. H., address	287
		Wall, W. G., address	287
		Annual Meeting, S. A. E.	
		Body session	282
		Chassis session	278
		Chassis session, papers for	10
		Diesel-engine session	8, 154
		Engine session	267
		Exhibits of Instruments	284
		Fuels Subcommittee meeting	286
		Headlight Subcommittee meeting	286

		Meeting	283

Annual Meeting, SAE (Concluded)

Report	248
Standards session	108
Stock-car contest session	147
Tire simplification session	270
Treasurer's report	250
Wall, W G, address	145
Annealing furnaces, battery of	166
Anti-freezing solutions, data on	40

Antiknock

Gasoline, demonstration of	129
Study of scales	466
Values reported	460
Arbors and milling cutters	321
Arc-welded joints, inspection of	320
ARCHER, R S, ON DEVELOPMENT OF ALUMINUM FOR AUTOMOTIVE PURPOSES	600

Army

Motor-transport operation activities	376
Motor-vehicle plan of interest to makers	296
Motor-vehicles	256
Three-wheel motorcycle	7
Army system of motor-transportation maintenance (Lieut W C Thee, U S A)	423
Asbestos brake-lining, types of	371
Associations	683
ATWELL, C A, ON GENERATORS AND MOTORS FOR GAS-ELECTRIC MOTORCOACH DRIVES	298, 485, 494
Auburn automobile (H C Snow)	156
Australia's transportation needs	1

Automobile Frames

Inspecting and piling stock	392
Made in less than 2 hr.	392
Production by automatic machinery	392
Automobile industry, present and future condition of	730
Automobile lacquer (Dr G C Given)	283

Automobiles

Aids to international touring	258
Air-cooled	296
America's future	487
Better performance comes from larger	104
Body sells	410
Bumper mountings	123
Can gain standard performance in various ways	101
Company mortality rate high	231
Criticisms by users are invaluable	317
Engine and car performance 96, 134,	336
Equipment	165
European practice	620
Factories need data from operators	317
Ford, new model	142
Foreign and new type home competition	231
How operation affects crankcase-oil dilution	138
Increased ease of manufacture	224
Lacquer	283
Lacquer surfacers	235
Low-car demand affects tire size	227
Measuring riding-qualities	276
Mortality in manufacture	224
Must sense and improve on public taste	473
New developments in design	388
Period of rising general prices	224
Place of engineer in industry	233
Public shows little interest in tire sizes	228
Right-hand rule	383
Rise and fall of firms in industry	224
Seeking to express a fundamental idea	473
Sheet-metal and body	165
Shock-absorbers from manufacturer's viewpoint	279
Small-car development	297
Some aspects of supercharging for sea-level conditions	195, 268
Standard gearshift universal	165
Stock-car	
Contest	147
Racing	297
Style and design as selling factors	468
Supercharged	486
Test of survival	224
Use of design and style as a selling point	282
Visibility distance	
Size, shape and color of various objects versus	307
Speed versus	307
Various amounts of moonlight versus	308
West Coast operation and maintenance	316

What sells	140
Why traffic accidents happen	317
Will four-cylinder, vanish	297
Automotive development in Europe (J B Fisher)	492

Automotive Engineering

Status at the brink of 1928	163
Research in	495
Automotive full-Diesel engine (R J Broege)	154, 177
Automotive grinding compounds	320

Automotive Industry

Alloy steels as applied to the	484
What's new in the	387
Automotive practice followed by tractor engineers	111
Automotive research (W S James)	131

Aviation

Canadian-American future	406
Commercial	
Impressions of	495
Making money	597
Turning to larger engines	221
Commercial operation of air service	363
Feature flying denned	255
Flight	
In Central and South America	152
Over the Caribbean Sea	150
Flying through fog	355
General Western-hemisphere conditions	150
Government of international traffic	406
International commercial flying in the Western Hemisphere	150
International flight on the North American continent	152
International travel will increase	406
National air races	603
Oversea navigation	670
Possibility of roof-landing fields	417
Preparation for Transatlantic flight long and thorough	255
Transatlantic flight	255
Weather forecasting	670
Axle ratio, effect of increasing	562
Axle and Wheels Division, S A E, personnel	259

Axles

Front, and wheels	164
No, on motor delivery-vehicle	92
Rear	164
B	
BABITCH, A M, ON ADVANTAGES OF GASOLINE FUEL-PUMPS OVER OTHER GASOLINE-SUPPLY SYSTEMS	267
BACH, R M, ON DESIGN AND STYLE AS SELLING FACTORS	282, 468
BACHMAN, B B, ON TRUCK DESIGN	606
BACHMAN, B B, ON TRUCK FIELDS AND FEATURES	132
BACON, DAVID L, ON BENEFITS OF A CO-ORDINATED RAIL AND HIGHWAY SYSTEM IN NEW ENGLAND	4
Baer, C A (discusser)	372
BAKER, EDWIN M, ON PROTECTIVE VALUE OF CHROMIUM-PLATE	281, 331

Ball and Roller Bearings Division, S A E

Activities	483
Annual meeting report	113, 170, 171
Personnel	113, 259
Standards approved by letter-ballot	481
Ball-bearing corner-radii standardization	735

Ball Bearings

Radii	113, 170
Standardization	481
Ball - Bearings Sectional Committee, activities	483
Balloon-tire sizes standardization	725
Balloon tires, proposed simplification recommended by Rubber Association of America, Inc	271
BANKS, W F, ON MOTOR-TRANSPORT ACCOUNTING	173
Barber, H E (discusser)	355
BARNARD, D P, 4TH, ON AUTOMOTIVE FUELS AND LUBRICATION	608
BARNARD, D P, 4TH, ON MOTOR-OIL CHARACTERISTICS AND PERFORMANCE AT LOW TEMPERATURES	213, 276, 334
BATES, LIEUT JOHN W, ON SAFETY IN STREETS WITH FOUR-WHEEL BRAKES	140

Battery and magneto ignition-systems (Robert Parker and E E Tattersfield)	253
Battery ignition system	253
BAUMGARTNER, W J, ON TRUCK DESIGN	607
Beall, A L (discusser)	558

Bearings

Adapter-sleeve	482
Ball, radii	113
Corner radii	482
Eccentricity	482
Gaging	482
Inch-dimension	482
Metric thrust tables, near agreement on	481
Reconditioning	34
Roller	113, 171
Tolerances	482
BECKER, L A ON EXTERNAL CYLINDRICAL HONING	73
Becker, Walter C (discusser)	68
BECKHARD, BRUNO, ON OUTBOARD ENGINES	693
Beacons, 8,000,000 cp.	345
Bedford, Fred J (discusser)	73
BECKROFT, DAVID ON STOCK-CAR RACING	148
Belt, tinners' and coopers' rivets	172, 264
Belts, fan, and pulleys	118, 170
BENDEL, WILLIAM C, ON SERVICING CITY-OPERATED MOTORCOACHES	386
Benefits of a coordinated rail and highway system in New England (David L. Bacon)	4

Benzol

Equivalents	460
Volatility, effect of	461
BERRY, JOHN, ON COMMERCIAL AVIATION	598
BEST, H W AND E H LOCKWOOD ON AUTOMOBILE BRAKE LEGISLATION	619
Betancourt, G (discusser)	433
Bibliography on air-cleaners	38
BIDDLECOMBE, C H, ON WRIGHT WHIRLWIND ENGINE IN COMMERCIAL OPERATION	221
BILLIOQUE, H, ON STROBORAMA	276
Biplane or monoplane	49

Biplanes

Affords better vision	51
Has structural advantages	49
Is more rigid	49
Monoplane and, hold performance records	51
Where it excels	54
Black, Archibald (discusser)	520, 538
Blanchard, E P (discusser)	71, 641
BLANCHARD, E P ON INTEGRATED PRODUCTION	71
BLASINGAME, R U, ON ADVANCE OF MECHANICAL POWER IN PENNSYLVANIA	112
Blasingham, H T (discusser)	379
BLEE, COL H H, ON AIR-TRANSPORT CONDITIONS IN THE WESTERN HEMISPHERE	150
Boats, racing	693
Bockius, G (discusser)	369

Bodies

Construction and painting	37
Convertible	680
Design	690
Design and construction	409
Design, trends in	603, 679
Designs for public utility work	728
Make fit the man	473
Motorcoach	695
Seats	680
Sell the car	410
Truck	696
Upholstery	680

Body Division of Detroit Section

April meeting	603
Formed	405
March meeting	409
Officers	409
Body design and construction (O T Kreusser)	409
Body-parts nomenclature standardization	719
Body session at annual meeting, S A E	282
BOELTER, L M K ON THE HEADLIGHTING SITUATION IN CALIFORNIA	684
Bohn, G H (discusser)	563
Bolts, round unslotted-head	127, 265
Ronyses, supplemental	64
Boston, Orlan W (discusser)	641, 642
Boulton, B C (discusser)	433
Bouton, Eugene (discusser)	71, 73

INDEX TO VOLUME XXII

5

- Box section frame in the Stearns-Knight cars 252
 BOYD, T A ON FUTURE AUTOMOTIVE FUELS 131
 BOYD, T A ON MOTOR-FUELS 728
 Brake adjustment (J G Hulme) 300
 Brake development has not lagged 299
- Brake Drums**
 Cast-steel, reduce brake wear 317
 Clutch plates and 212
 Influence of material 372
 Material 585
 Too little metal in 300
- Brake-Linings**
 Advantage of Carson testing machine 374
 Agreement as to methods of testing 376
 Asbestos, types of 371
 Braking problem tied up with 134
 Cause of wear 300
 Continuation of 1922 report on tests 365
 Durability of similar samples 370
 Equipment versus test conditions 375
 Failures 34
 Final selection of 374
 Grease, effect of 367
 Influence of brake-drum material 372
 Intermittent tests, advantages of 375
 Maintenance 585
 Manufacture and life 300
 One type of testing machine desirable 369
 Other causes of friction variation 367
 Problem in hand influences laboratory tests 370
 Temperature of test is keynote 369
 Treating compound may reduce frictional value 371
 Trend toward better 372
 Variation of coefficient of friction of small interest 375
 Water, effect of 368
- Brake-linings and cause of brake-lining wear (John H Watrous) 300
 Brake linkage, lubrication of 368
 Brake-testing (Charles F Smith) 390
 Brake testing (J E Van Sant) 300
 Brake testing and equipment (F W Parks) 394
 Brake-testing equipment (F W Parks) 390
 Brake-testing equipment of flywheel type 390
 Brake-testing machine, difficulty with 371
 Brakes 164
 Brakes (Paul D Harvey) 141
- Brakes**
 Adjustment 300
 BK vacuum attachment 299
 Cast-steel drums reduce wear 317
 Development 299
 Development has not lagged 299
 Failures 34
 From standpoint of fleet operator 492
 Hydraulic 141
 Ideal four-wheel 141
 Improvement in mechanical 141
 Legislation 619
 Misconceptions corrected 374
 More improvement of design needed 373
 Opportunities for improvement 35
 Poor adjustment demonstrated 137
 Problem tied up with brake-linings 134
 Relation to highway safety 492
 Safety in streets with four-wheel 140
 Self-energizing 280, 514
 Testing 300
 Vacuum 651
 Passenger cars 123, 172
 Manifold connection 386
 Wear due to severe service 140
 What automobile should accomplish 299
- Brakes and brake development (E M Rondot) 299
 Brakes from the standpoint of the fleet operator (F R Mauley) 492
 Brakes with BK vacuum attachment (M E Foster) 299
 Braking, analysis of conditions 373
 BRAMBERRY, HARRY M, ON PISTON RINGS 605
 Brewer, R W A (discusser) 672
 BREWER, R W A, ON THE DESIGNING OF RADIAL AIR-COOLED ENGINES FOR COMMERCIAL AIRPLANES 731
 BRIDGEMAN, O C, ON VOLATILITY DATA FROM GASOLINE DISTILLATION CURVES 275, 437, 550
 BROEGE, R J, ON AUTOMOTIVE FULL-DIESEL ENGINE 154, 177, 531
 Brown, George Granger (discusser) 565
 BROWN, GEORGE GRANGER, ON PRESENT TENDENCIES IN MOTOR-FUEL QUALITIES 266, 559
- BROWN, ROY W, ON THE MEASUREMENT OF RIDING-QUALITIES 276, 636
 Brown, W G (discusser) 432, 539
 BROWN, SERGEANT WESLEY, ON WHAT AUTOMOBILE BRAKES SHOULD ACCOMPLISH 140
 BRUNN, HERMANN A, ON TRENDS IN BODY DESIGN 603, 679
 BUDD, RALPH, ON PRESENT TREND IN PASSENGER TRAVEL 288
 Buerk, Hans (discusser) 678
 Buick automobile (F T Wilson) 107
 Building metal airplane structures 426
- Bumpers**
 Motorcoach, adequate, a difficult problem
 Passenger-car, mountings 123, 172
- Bureau of Standards**
 Advisory Committee on Structures and Fabricated Metals, representatives 262
 Ferrous Metals Committee, representatives 262
 Bureau of Public Roads Motor-Truck Impact Tests Cooperative Committee, representatives 263
 Burger, L F (discusser) 532
 BUSHEY, J S, ON FRONT-WHEEL ALIGNMENT 139
 By-pass roads 86
- C**
 Cable, conduit and tubing clips standardization 711
- Cable-Terminals**
 Specifications 592
 Standardization 710
 Calculations of combustion products 21
 Calibration of apparatus for distillation of gasoline 438
 California common-carrier tax situation of motor-vehicles 29
 CALINGAERT, GEORGE, ON FUELS 129
 Camber, front-axle, and caster 35
- Camera**
 Chronoteine 200, 276
 Exposures longer with chronoteine, than with intermittent 201
 Cams and dies 212
 Camshaft, novel quenching 167
 Canadian-American aviation, future of 406
 Canadian exploration, the airplane in (A M Narraway) 620
 Capacity and voltage ratings 171
 Capital and labor relationship 128
- Carbon Monoxide**
 Content in air 571
 Garages 572
 Streets 572
 Vehicular tunnels 572
 Physiological effects of 573
 Carbon-monoxide research 506
- Carbon-Monoxide Research**
 Automotive phases summarized 570
 Bibliography 579
 CARBONARA, V E, ON AIRCRAFT INSTRUMENTS FOR OVERSEA NAVIGATION 670
- Carbureters**
 Equilibrium-distillation basis for 31
 Principles of design 32
 Carburetion in fleet operation 31
 Carson brake-lining testing machine, advantages of 374
 Car-frame numbers, standardization 717
- Car Performance**
 Methods of improving 561
 Tests standardization 717
 CARIS, D F AND MARTIN, E J, ON A NEW TYPE OF ELECTRICAL ENGINE-INDICATOR 620
 CARTWRIGHT, D P, ON ELECTRICAL SERVICE FOR AUTOMOBILES 694
 Carvelli, Gustaf, (discusser) 564
- Cast Iron**
 Machinability and wear 641
 Machinability and wear data 206, 280
- Properties improved by nickel and chromium 208
 Research on hardness and machinability of 280
 Variety and character of constituents 206
 Wear resistance of different constituents 207
 Caster and front-axle camber 35
 CAUTLEY, JOHN R, ON IMPROVEMENT IN MECHANICAL BRAKES 141
 Ceader, J D (discusser) 71
 Central Committee on Lumber Standards, Hardwood Consulting Committee, representative 262
 Chain-drive and worm-gear applications to motor-trucks 133
 Chairman, Irving I (discusser) 433
 CHAMBERLAIN, A I, ON GARAGE EQUIPMENT 694
 CHANDLER, F F, ON THE INSTABILITY OF THE FRONT END OF AUTOMOBILES 733
 CHANDLER, F F, ON STEERING-GEARS 609
 Chandler, H T (discusser) 62
 CHASE, HERBERT, ON FRONT-WHEEL DRIVES: ARE THEY COMING OR GOING 690
 Chase, T P (discusser) 518
 Chassis, no, frame on motor delivery-vehicle 92
 Chassis session at annual meeting, S A E 10, 278
 CHATFIELD, C H, ON MONOPLANE OR BIPLANE 49
 Chemical composition of S A E steels 172
 Chemical warfare 48
 China, the markets of 635
- Chromium**
 Copper does not deposit on, from an acid bath 334
 Properties of cast iron improved by nickel and 208
- Chromium-Plate**
 Base plate largely determines protective value 333
 Base plating determines rust-resisting value 334
 Combination employed 332
 Discussion of results obtained 332
 Protective value of 331
 Chromium-vanadium steels, correlating test-data on heat-treated 55
 Chronoteine camera (C. Francis Jenkins) 200, 276
- Chronoteine Camera**
 Exposures longer than with intermittent camera 201
 Makes 3,200 exposures per sec. 200
 Pictures have good photographic qualities 202
 Rotating disc carries 48 matched lenses 201
 Several ways of timing exposure rate 201
 Chuck-jaws, mounting of removable 692
 Civic planning for airports and airways (John Nolen) 411
 CLARK, DR. GEORGE L, ON NEW ADVANCES IN THE STUDY OF ENGINEERING MATERIALS BY MEANS OF X-RAYS 130
 Clayden, A Ludlow (discusser) 556
 Clutch-housing hole change 118
- Clutch-Plates**
 Brake drums and 212
 Preventing distortion 167
- Clutches**
 Housings 171
 Transmission and 163
- Combustion Products**
 Calculations of 21
 Development of general formulas 21
 Ideal volumes of the 19
 Commercial aviation, impressions of (George J. Mead) 495
 Commercial operation of air service (C C Moseley) 363
- Committees**
 A-1 and Its Subcommittee X on Automobile Steels of American Society for Testing Materials, representative 262
 A-7 on Malleable Iron of American Society for Testing Materials, representative 263

Committees (Concluded)

Administrative, S A E, personnel	257
Advisory Board of Government Technical Lubricants and Liquid Fuels, representative	263
Advisory, on Structures and Fabricated Metals of the Bureau of Standards, representatives	262
American Engineering Standards Executive, representative	262
Form and Arrangement of Specifications, representatives	263
Main, representatives	262
American Marine Standards, of Division of Simplified Practice, representatives	262
Bureau of Public Roads Motor-Truck Impact Tests, Cooperative representatives	263
Constitution, S A E, personnel	257
Cooperative Fuel Research Steering, representatives	263
D-2 on Oils of American Society for Testing Materials, representative	263
Die-Casting Metals and Alloys Sub, XV of B-2 of the American Society for Testing Materials, representative	263
Ferrous Metals, of the Bureau of Standards, representatives	262
Finance, S A E personnel	257
Fuels Sub, S A E	
Annual meeting	286
Personnel	258
Hardwood Consulting, of Central Committee on Lumber Standards, representative	262

Flanges

Duplex-carbureter, new	106
Round pipe	172
Flat-rate system, textbook on	386

Fleet Maintenance

Choice of equipment	30
Class-A equipment	27
Class-B equipment	27
Light commercial-equipment, Class C	28
Pacific-Coast practice	27
Standardization would reduce costs	30

Fleet Operation

Accounting	173
Accounting practices	30
Accumulation of costs	176
Allocation of cost-accounting work	68
Brakes	492
Carburetion	31
Careful planning required for economy	336
Choice of parts for rebuilding	70
Classification of accounts	173
Cooperation of associations	68
Cooperative deliveries in outlying areas in London section not practical	8
Quality of replacement parts	69
Rebuilding of batteries	69
Uses of cost data	176

Fleet Operators

Factory and, attitude compared	66
Influence on design and construction	65
Fleets, standardization of large	478
Flexible-conduit ferrule standardization	711
Flight in Central and South America (Major Herbert A Dargue)	152
Flight over the Caribbean Sea (E P Warner)	150
Floodlighting, methods of field	347
Flying through fog	355

Flying-Boats

Forming and assembling hull members	428
Sheet-metal gives strength with light weight	428
Flywheel type of brake-testing equipment	390
Fokker, A H G (discusser)	539
Fokker, A H G, on SINGLE-ENGINE VERSUS MULTIPLE-ENGINE AIRPLANES	190
Ford car, new model (R C Purdy)	142

Fowler, Harlan D (discusser)	540
Frame	164
Frame, box-section, in the Stearns-Knight cars	252
Frames, the automatic fabrication of automobile (John P Kelley)	565
Franklin automobile (E S Marks)	158
FRANZEN, TORE, ON EUROPEAN ROADS AND AMERICAN CARS	620
Freers, George H (discusser)	380
FRERS, GEORGE, ON MARMON AUTOMOBILE	158
Freight, motor transportation	205
Freight-handling costs, need data on	5
FRENCH, N C, ON CHASSIS LUBRICATION	604

Frequency Curves

Results of chromium-vanadium steel tests expressed in	56
Used in other work	60
Will develop, if value warrants	63
Will give accurate values	397

Friction

Damping and, not the same	278
Treating compound may reduce brake-lining	371
Variation in brake-linings, other causes	367
Variation of brake-lining, coefficient of small interest	375

FRITCH, H F, ON RAIL-CAR OR MOTOR-COACH—THE ECONOMIC FIELD OF EACH	82
--	----

Front-Axle

Camber and caster	35
Caster and camber	732
Front-wheel alignment	732

Front-Wheel Alignment

Basis of successful	139
Effect on tire wear	139
Should rely on manufacturer for	139
Front-wheel alignment (J E Van Sant, F S Hoover and J S Bushey)	139
Front-wheel drives	690
Frost, Jack, on SCIENTIFIC VALVE RE-CONDITIONING	253, 644
Fuel and cooling systems	33
Fuel consumption decreased 10 per cent	342
Fuel-injection engines, high speed	495
Fuel oil vaporizing and Diesel engines compared	182

Fuel-Pumps

Advantages of gasoline over other gasoline-supply systems	267
Mounting standardization	708
Fuel tanks, what is wrong with motor-coach	352
Fuels (George Calingaert)	129
Fuels (W H McAdams)	129

Fuels

Antiknock values reported	460
Antiknocking, economy of	562
Comparison of methods of measuring knock characteristics of	41, 274
Comparison test to rate unknown	451
Consumption	561, 728
Experimental results of knock tests	45
Future automotive	131
High compression wanted despite premium	102
Ideal volumes of combustion products	19
Knocking due to extension of radiation	130
Knock-rating methods	550
Knock-test methods used by different laboratories	42
Lubrication and	608
Mixture-ratio, effect of	465
Note on requirements for engine starting	447
Other methods of rating	45
Present tendencies in	559
Present tendencies in qualities of motor	256
Probability law applied to fuel distribution	20
Recommendations for future development	274
Research	245
Special, and oil not needed in aircraft engines	223
Study of antiknock scales	466
Survey of	455
System and manifolding	163
Used for knock tests	41
Uneven distribution reduces knock tendency	104
Vaporization, effect of, and charge temperature	104
Volatility, partial	560

Fuels Subcommittee, S A E

Annual meeting	286
Personnel	258
Future automotive fuels (T A Boyd)	131
Future of Canadian-American aviation (J A Wilson)	406

G

Gages, cylindrical and thread plug	24
Gaging bearings	482
Garage and service-station management course of division of university extension	176

Garages

Design and operation of modern	488
Design based on vertical car movement	489
Equipment to reduce maintenance cost	693
Ramp models	490

Gas-Electric Drive

Generators and motors for	298, 485, 494
Structural details of electrical units	298
Taxicab test	298

Gas-electric taxicabs (Guy W Willson)	298
Gas engine lubrication (H L Newton)	138
Gas, natural	234

Gasoline

Calibration of apparatus for distillation	438
Demonstration of antiknock	129
Dew-points	444
Equilibrium air-distillation apparatus	438
Equilibrium-distillation basis for carbureters	31
Gage	490
Lean explosive limits of cracked and straight-run	447
Sources and substitutes	597
Treating	330
Volatility data from distillation curves	275, 437
Volatility of reference	466
Gasoline and Diesel engines compared	182

Gears

Ground, and transmission design	620
Inspection and production	620
Steering, connecting-rods	172
Third differential on six-wheel vehicle	202
Geisse, J H (discusser)	531, 552
General theory of container use (Bernard Allen)	74
Generation of electric current for automotive apparatus (B M Leece)	390

Generators

Basis of rating	172
Classification of	660
Large equipment economical but needs space	391
Mounting standardization	708
Third brush	660, 694
Voltage regulated	661
Voltage-regulated versus third-brush types	391
Why operators and makers have trouble	391
Generators and motors for gas-electric motorcoach drive (C A Atwell)	298, 485, 494

TEETOR, R R, ON MEASURING AND TESTING PISTON-RINGS	587, 605

Temperatures

Brake-lining test, is keynote	369
Motor-oil characteristics and performance at low	213, 276, 334
Vaporization, effect of, and charge	104
Terminals, storage-battery	114, 171
Testing, dynamometer, of Ordnance vehicles	506

INDEX TO VOLUME XXII

15

Testing Machine

- Difficulty with brake 371
One type of brake-lining, desirable 369

Tests

- Agreement as to method of brake-lining 376
Apparatus and methods used for detonation 458
Brake 300
Brake and equipment 394
Comparison, to rate unknown fuels 451
Continuation of 1922 report on brake-lining 365
Correlating data on heat-treated chromium-vanadium steels 55
Correlating indoor and outdoor, of lacquers 422
Distribution, of weight of motor-coach 353
Engine forms 171
Equipment for brake-lining, versus conditions 375
Experimental results of knock 45
Fuels used for knock 41
Gas-electric taxicab 298
Head-lamp laboratory 121, 172
Headlight methods described 305
How motorcoach load-distribution, were made 354
Influence of brake-drum material on brake-lining 372
Instructions governing chromium-vanadium steels 55
Intermittent brake-lining, advantages of 375
Method of constructing the curves of chromium-vanadium steel 57
Methods used by different laboratories for knock 42
Oil-circulation 220
Piston-rings 587, 605
Problem in hand influences brake-lining laboratory 370
Procedure for observations without approaching lights 306
Report of propeller performance 78
Results of chromium-vanadium steel, expressed in frequency curves 56
Sandpaper, proposed 169
Steering-wheel 594
Survival of automobiles 224
Temperature is keynote in brake-lining 369
Tetraethyl lead equivalents 462
Textbook on flat-rate system (A V La Due) 386
THE, LIEUT W C, U S A, ON ARMY SYSTEM OF MOTOR-TRANSPORTATION MAINTENANCE 423
Third differential-gear on six-wheel vehicle 202
THOMAS, PAUL, ON APPEAL OF THE MOTOR-CAR TO WOMEN 690
THOMS, L. ON PAIGE AUTOMOBILE 158
THORNCROFT, SIR JOHN E. ON ENGLISH METHOD OF TAKING THE TORQUE 3
Thread and cylindrical plug-gages 24
Threads, oil and grease-cup 125, 172
Three-wheel army motorcycle 7
Tierney, J W (discusser) 69
Time-lag of ignition a serious barrier in Diesel engine 188
Timing-chain troubles 34
Timmers', coopers' and belt rivets 172, 264

Tire and Rim Division, S A E

- Annual meeting report 127, 265
Personnel 127, 261, 725
Standards approved by letter ballot 481
Tire simplification session 589
Tire making and size simplification (B J Lemon) 135

Tire Production

- Fabrics, development in 510
Flat-band process 512
Rubber plantation development 508
Sprayed rubber latex 509
Tread stock 512

Tire Simplification Session

- At annual meeting 270
In Detroit 589
Tire Simplification Special Advisory Committee, S A E, report 273
Tire-size simplification, symposium 225

Tire Sizes

- Car-buying public shows little interest 228

- Department of Commerce will help simplification program 232
Five, comprise 80 per cent of sales 226
Ingenuity resulting in profitless activity 225
Low-car demand affects 227
Remedy seen, but cooperation lacking 226
Should simplify, to eliminate waste 232
Simplification an aid to industrial self-preservation 228
Simplification of 227
Symposium on simplification 225
To present revised S A E recommended practice 227
Variety 227
Due to improvements 227
Responsible for high overhead 229

Tires

- Conflicting, and economic pressure 228
Economic waste of needless variety 225
How obsolescence absorbs profits 226
Making and size simplification 125
New model every week 136
Problems 418
Problems created by pneumatic, use 133
Proper inflation-pressure important 36
Recent improvements in making 135
Riding-qualities 276
Rim fits can be standardized 136
Rims for low-pressure 127, 265
Shimmy as a cause of wear 733
Simplification of sizes 135
Size simplification, symposium 225
Troubles 35
Uneconomic competition in grades 226
Wear, effect of front-wheel alignment on 139
Toe-in or toe-out, improper, easily corrected 139

Tolerances

- Bearing diameters 482
Taper-fitting, revised 125, 172
Widths of bearings 482
Tomorrow's motorcoach legislation (A M Hill) 203
Tool-holder shanks and tool-post openings standardization 691, 719
Tool standardization 691
Tool Steel Subcommittee XIV of Committee A-1 on Steels of American Society for Testing Materials, representative 263

Tools

- Circular forming and holders 692
Development of 674

Torque

- Changed, peak without changing timing 102
English method of taking 3
Towle, H Ledyard (discusser) 474
Touring, facilities for European motor 643
Tractor Meeting, S A E, reviewed 108

Tractors

- Advance of mechanical power in Pennsylvania 112
Audience interested in snow plowing 111
Engineers following automotive practice 111
Farm, lumbering and snow-removal work 110
Greatly improved 111
Importance of power in potato growing 112
Industrial and military operations 111
Inventors with new ideas welcome 111
Machines built to work with 110
Nation's hired hand 108
Power applications of the 111
Rapid increase in farm 112
Supercharger for 599
Varied uses in the oil fields 110

Trade

- Foreign 683
Human factor in 23
Trade associations serve industry, how 381

Traffic

- Aids to international touring 258
Congestion, relief of 601
Elevated highways 602
Governing causes of accidents 318
Government of international air 406
International touring and, congestion 3
Parking privilege abolition 602

- Possibilities of redistributing 83
Relief 586
Right-hand rule for automobile driving 383
Road, congestion and related problems 4
Road planning for relief 212
Signal uniformity 586
Strangulation, relief of 189
Volume determines choice of rail-car or motorcoach 84
Why accidents happen 317

Transatlantic Flight

- Earth-indicator compass went wrong 255
Feature flying defined 255
Preparation long and thorough 255
Zero hour came at length 255
Transatlantic flight (Commander George Noville) 255
Transactions, proposed new form for 621

Transmission

- Clutch and 163
de Lavaud 689
Front-wheel drives 690
Ground-gears and transmission design 620
Transmission Division, S A E, personnel 261

Transportation

- Army system of motor, maintenance 423
Conditions in Europe 5
General theory of container use 74
Ground connections to airports 414
Highway 39
Mass, in cities 344
Motor freight 205
Must recognize changed travel habits 82
Needs of Australia 1
Present trend in passenger 288
Rail and road coordination the problem 1
Rail-car or motorcoach 82
Road construction and improvement in relation to the development, efficiency and economy of road 1
Road, accounts 7
Supervision of motor-vehicle, at long distance 494, 688
Trask, C A (discusser) 379
Treasurer's report at annual meeting, S A E 250
Treating gasoline 330
TREIBER, O D, ON AN AMERICAN MERCHANT MARINE 507
TREIBER, O D, ON DIESEL ENGINES 484
TREIBER, O D, ON HIGH-SPEED DIESEL ENGINES 154, 183, 531
Truck fields and features (B B Bachman) 132
Truckman's capacity increased and space saved 475
Trucks 165

Trucks

- Bodies 696
Distinctive features 606
Supervision of operation 688
Truscott, Starr (discusser) 432
Twin coach (Frank Fageol) 134
Tyler, Harvey E (discusser) 69
University extension course in garage and service-station management 176
Universal-joint and propeller-shaft 164
Unslotted-head bolts, round 265
Upham, E W (discusser) 60
Upkeep of storage-batteries 38
Urban population in 1950 251
Use of design and style as a selling point (Richard M Bach) 282

V

- Vacuum-brake manifold connection, 123, 172
Valve-spring surge (W T Donkin) 131, 388

Valve-Springs

- Design for poppet valves 689
Failures eliminated in redesigned 131
Surge 131, 388

Valves

- Defects 644
Effect of, on engine performance 731
Guide clearance 645
Methods of reconditioning 33
Other parts and 33
Scientific reconditioning 253, 644
Stem inaccuracies 645
